Help protect your facility and occupants with disinfection

Right now, it's not business as usual. As the world struggles with the uncertainties and dangers created by COVID-19, you could be struggling to keep your business going. One of the best ways to protect your facilities and their occupants is with enhanced cleaning. Specifically developed and continually updated to reflect CDC best practices, ABM EnhancedClean™ offers an effective strategy to provide a safer environment. Reach out to us to learn more. We're here to help.

3 Ways We Can Help

Hygiene and Safety Products

While prevention is key to the spread of any virus, there are products we can provide beyond general cleaners as part of your regular cleaning service for building entrances, commonly used areas, high-touch surfaces or in specialized applications.*

**Based on availability*

Using Enhanced Methods and Disinfectants

Switching from all-purpose or general cleaners to EPA-registered disinfectants will help prevent the spread of pathogens while following strict disinfection procedures. ABM uses disinfecting procedures for high touch surfaces.

Increased Frequency Cleaning

Increased frequency of cleaning with disinfectants in high traffic areas is an additional measure you can take to help protect your facility and occupants. ABM will partner with you to understand traffic patterns and occupancy levels to determine your specific needs.
